

Libretto: *Sensible HR* Human Resources Compliance Solution

Libretto: *Sensible HR* by Agent 77 is a comprehensive, yet easy-to-use, web-based software solution designed to assess your organization's level of compliance with state and federal HR regulations, and assure "best practices". Libretto includes Agent 77's comprehensive library of forms and documents to provide a complete solution.

Forms & Documents Library

Libretto's forms and documents library includes over 300 HR forms, policies, guidelines, checklists and sample documents to support daily HR operations, and address prioritized needs identified by the Libretto compliance assessment.

HR Compliance Assessment

The Libretto HR Assessment is a web-based HR audit performed through a series of comprehensive, easy-to-answer HR and compliance-related questions. The result is a summary of recommendations prioritized in order of compliance-related urgency and "best practices" suggestions. The Forms & Documents Library is linked to each recommendation so that solutions can easily be implemented. Updates on federal and state regulations are periodically issued to keep your HR operations current.

Additional Benefits:

- HR issues are organized in 10 individually accessible compliance categories, covering over 100 separate HR issues
- Quick access to program status assists in managing and monitoring progress toward compliance
- Economical annual renewal keeps your program current, as your organization grows, and state and federal regulations change
- Web-based system eliminates the need for you to maintain computer support for your compliance program and document library; also provides secure access to the system from multiple locations

Libretto: *Sensible HR* is both user-friendly and comprehensive – currently in direct use by small and medium size organizations to support a majority of their HR needs. Libretto is also used by HR consultants to streamline their compliance assessments and program development services. The economical cost of Libretto is easily justified by the access to documents, time savings and risk avoidance it provides.
